# IMPORTANT INSTRUCTIONS

Please read and understand this entire manual before attempting to assemble, operate or install the product.

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons including the following:

1. Read all instructions before using this appliance.
2. The appliance is not to be used by children or persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.
3. Any repairs to this builder box should be carried out by a qualified service person.
4. Do not use outdoors.
5. To cut the power to the unit, turn the on/ off on the wall mounted controls to the off position.
6. This appliance, when installed, must be electrically grounded in accordance with local codes or, in the absence of local codes, with the current CSA C22.1 Canadian Electrical Code or for U.S.A. installations, follow local codes and the National Electrical Code, ANSI/NFPA NO.70.
7. This appliance is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this appliance. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes and curtains at least 3 feet (0.9 m) from the front of this appliance.  
**WARNING: In order to avoid overheating, do not cover the heater. It cannot be used in a closet.**
8. There is a thermostat limiter inside the heater. When the inner temperature over heating or occurs abnormal heating, the thermostat protective device would cut off power supply to avoid the fireplace damaged or risk of fire.
9. The heaters must not be located immediately below a socket-outlet.
10. To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where opening may become blocked.
11. Use this appliance only as described in the manual. Any other use not recommended by the manufacturer may cause fire, electric shock or injury to persons.

### **REPLACING THE REMOTE CONTROL BATTERY**

When the remote control stops operating or its range seems reduced, it is time to replace the battery with a new one.

1. The battery compartment is located on the back end of the remote.
2. Press and slide the battery door open and remove the old battery.
3. Insert 2pcs AAA batteries, checking that the + and - sides of the battery match inside the battery compartment.
4. Replace the battery compartment door.

NOTE: Do not mix old and new batteries.  
Do not mix alkaline, standard (carbon zinc), or rechargeable (nicad, nimh, etc.) batteries.  
Do not ingest.

### **DISPOSAL OF USED BATTERIES**

Battery may contain hazardous substances which could endanger the environment and human health.

This symbol marked on the battery and/ or packaging indicates that used battery shall not be treated as municipal waste. Batteries should be disposed of at an appropriate collection point for recycling.

By ensuring the used batteries are disposed of correctly, you will help prevent potential negative consequences for the environment and human health. The recycling of materials will help to conserve natural resources.

For more information about recycling of used batteries, please contact your local municipality waste disposal service.

As an important safety feature, the heating element is designed with a delayed activation sequence. Therefore, when the heater is turned ON it will take several minutes for the unit to begin blowing hot air. Subsequently, the fan blower will continue to run for several minutes after the heater is switched OFF.

If heater doesn't work, but Power and Heater switches are in the "ON" position and thermostat is set on "HI", the product is on the protected status, then turn all switches to the "OFF" position and unplug the unit from the wall outlet for 30 minutes. After 30 minutes plug the unit back into wall outlet, and operate as normal.
